Governor Gray Davis
State Capitol
Sacramento, CA

Governor Davis:

Water has been, is, and will be a issue of concern in California. Decisions need to be made now to insure a sustainable water future for our state. Therefore I urge you to plan a smarter course for California through the CALFED Bay/Delta program, a plan for protecting and using our water resources for the next 50 years.

We need to invest in water efficiency before considering new dams or reservoirs. We also need to restore our rivers, bays and fisheries by providing adequate fresh water and by stewardship of the land around our rivers. We need to improve water quality for people and wildlife through pollution limits. Additionally, the taxpayers should not have to pay for studies of new dams and reservoirs that flood habitat and remove water from our rivers. I believe the above-mentioned plan works to accomplish these goals.

Sincerely,

A handwritten signature in cursive script that reads "Meade Fischer".
